

ELECTRICITY:

ITS WONDERS AS A CURATIVE AGENT.

(Chartered under the Laws of Pennsylvania.)

FOR

THE TREATMENT OF ALL DISEASES,

No. 1230 WALNUT STREET,

Second door east of Thirteenth Street,

PHILADELPHIA.

PHYSICIAN:

DOCTOR M. J. GALLOWAY.

1878.

PRESS OF FRANKLIN PRINTING HOUSE, 38 HUDSON ST., PHILA.

OPINIONS OF THE PRESS OF PHILADELPHIA.

From the many editorial notices we have voluntarily received from the press of the city, we select the following:

THE ELECTROPATHIC INSTITUTION.—Among the many valued institutions that our good city contains, there is none that is more rapidly rising in public estimation than the above, which is now permanently situated at 1230 Walnut Street, one door east of Thirteenth Street. This institution, which has for its object the curing of all curable diseases by the different modifications of electricity, galvanism and magnetism, is under the charge of Dr. M. J. Galloway, the well-known medical electrician, assisted by other physicians of marked ability. The Doctor has labored with untiring energy for many years in this department of therapeutics, for the purpose of establishing this system of practice on a reliable, scientific basis. His highest hopes have been realized, judging from his success in controlling diseased conditions, which is so generally known in our city that comment here is unnecessary. The imponderable agent in his hands is mild and pleasant, even to the most delicate and sensitive persons, producing no painful or disagreeable feelings.

We visited this thriving institution a few days since, and the manner in which it is conducted, fitted up and arranged for the comfort and well being of patients, united with the skill and experience of the physicians, cannot fail to be of vast benefit to the suffering of the community.—*Phila. Press.*

We fully endorse all that our contemporary, "The Press" says of the Electropathic Institution, and would advise the suffering to avail themselves of this new and reliable treatment.—*Phila. Evening Telegraph.*

The wonderful success of Dr. M. J. Galloway in the curing of all Acute and Chronic complaints, by the different modifications of Galvanism, Magnetism and Electricity, has gained for him popularity throughout the world.—*Phila. Daily Card.*

This practice involves new principles in physiology, a new system of diagnosis or examinations of diseases, and new means of curing them. Dr. M. J. Galloway, of 1230 Walnut Street, is entitled to the credit of first bringing this wonderful discovery before the public, and the afflicted should not fail to examine his system of treatment.—*Phila. Com. List and Price Current.*

We call the attention of our readers to the new practice of Dr. Galloway, which is founded on sound philosophy, the correctness of which is demonstrated in the many wonderful cures he has made in our midst during the past ten years.—*Phila. Evening Star.*

H. Dorn
Bornsvill

THE
PHILADELPHIA ELECTROPATHIC INSTITUTION,
Chartered under the Laws of the State of Pennsylvania.

It is with much pleasure that we inform our readers, especially those interested in the progress and welfare of this new department of medicine—the curing of disease by the scientific application of the various forms or kinds of electricity—that a charter has been granted the institution, making it the *only chartered* Electropathic Institution in the country. This public recognition puts this scientific treatment on a permanent basis, and is the award of our sixteen years' successful practice in this city.

During these years we have had patients at the Institution from every State of the Union, and we have been enabled to discharge them cured, after all the other means they had tried had failed to do so. We make a *specialty* of Electricity, in its various modifications, for the cure of diseases, and to this end we have left nothing undone to make our system of practice as perfect as possible. Human life and health and happiness are daily in our hands, and appreciating this great responsibility, we use the currents of Electricity only with judgment and care, guided by our long experience, being convinced that good results can only come from proper treatment. Our faith in the cure of diseases by Electricity is great, just so far as the electrician is skillful and scientific,—and this is a desideratum of vital importance to the person who is thinking about taking electrical treatment. This hint we deem necessary, as many persons use electricity in a kind of random way who have never made electrical science a special study, and are therefore not qualified to be successful electricians. Standing as we have done for many years at the *head* of this new treatment —both as PRACTITIONERS and TEACHERS of the theory and practice—we claim to be able in every case to tell the afflicted

the disease or complication of diseases from which they are suffering, and that without asking them a question. After doing this, we can tell with the same certainty whether or not the electrical treatment will cure them. This knowledge has been gained by studying closely the action of this most subtle agent on the living organism, and watching its therapeutic effects in many thousands of cases. We guarantee cures after an electrical diagnosis. The present age is full of electrical energy, infusing life into and producing rapid progress and improvement in science and art generally, and our constant endeavor is to keep pace with the times, and improve on the former modes of treatment, so as to make our *specialty* more attractive and more highly beneficial to the suffering and those out of health.

The alterative effects of our treatment are exerted on diseases either of a functional or organic nature, and the fact that drugs have been thoroughly tried, and have not produced a cure is no reason for discouragement and despondency, as in very many such cases we restore the sufferers to perfect health. Therefore, we cordially invite the reader—if out of sound health—to consult us at once *free of charge*, as we ask nothing for consultation or advice.

Remember there are no shocks, or other unpleasant sensations.

The female department of the Institution is under the special care of MRS. DOCTOR GALLOWAY, who gives her professional attention to ladies requiring treatment at her hands.

CERTIFICATES OF IMPORTANT CURES.

VERY BAD DYSPEPSIA CURED.

DR. M. J. GALLOWAY.

Dear Sir: I cheerfully make this statement of facts. For some years I had been a great martyr to a most horrid Dyspepsia that made my life miserable. I had consulted several physicians and taken a great deal of medicine, but all failed to relieve me of my dreadful sufferings. I was a complete wreck, and had about given up all hopes of ever getting cured. While on a visit to Philadelphia, I was advised by a friend to call on you and get your opinion of my case, I did so and you at once pronounced me curable. I felt happy at the prospect of enjoying good health again, and placed myself under your electrical treatment. I commenced feeling better from the first, and in less than a month I was thoroughly cured and rid of all my horrid feelings, my appetite now is good and I relish my food and sleep well. It is now three months since I have returned home, and I have gained fifteen pounds. My Dyspepsia is entirely cured and I feel like another man, and my firm conviction is that your treatment is the only cure for that awful disease.

J. H. BUCHANAN, MERCHANT,

October 9th, 1876.

Fairview, Harrison Co., Ohio.

PARALYSIS OF THE ARM CURED.

DR. M. J. GALLOWAY, 1230 Walnut Street.

Dear Sir: For the benefit of sufferers like myself, I would say that you have entirely cured me of an attack of Paralysis of the right arm. I was suffering greatly with the numbness, and my arm was of no use to me, but after four weeks of your electrical treatment, the natural feeling and action was restored, and it is now as well as as the other. While going to your office I saw many other remarkable cures. I will always feel grateful for the great good you have done me, and can speak in the highest terms of your treatment.

JOHN QUINN,

December 11th, 1876.

116 Union Street, Philadelphia.

KIDNEY COMPLAINT CURED.

For the past three or four years, my health had been gradually running down, and I could not understand the cause of it. At first I was not much alarmed; but as time wore on, my sufferings kept getting worse. I began to lose flesh, my natural color left me, and my appetite became very irregular. I applied to several physicians; but they did not seem to understand my disease, for I kept growing worse. I was troubled with palpitation of the heart, difficulty of breathing, oftentimes trembling of the limbs, soreness in my throat, loss of memory, and great aversion to business and to society. At times I was very gloomy; and what caused me to feel worse, was my inability to collect my thoughts vigorously on any subject. I suffered much from swimming in the head, and much from fears of getting insane; for my physicians had told me that I had symptoms of fits. But after persevering for a long time in the old-school remedies, and in the homœopathic also, I was informed my case was beyond cure.

Seeing the Pamphlet of Dr. Galloway of 1230 Walnut Street, I called on him; and after conversing for a few minutes, he told me that he could cure me. I commenced his treatment, and I am happy to say, that in nine treatments of about ten minutes each, I was perfectly cured.

CHAS. E. BUCKINGHAM, 1331 Filbert Street.

CATARRH.

We cure hundreds of this distressing complaint every year. It has become a very common disease and many are afflicted with it, that never realize the fact until it has undermined their constitutions. The disease is of a most disagreeable character, producing Headache, Pains over the Eyes, difficulty or inability to breathe through the Nose, Offensive or Acrid Discharges, Hawking, Sore Throat, Bronchitis and in many cases ending in Pulmonary Consumption. We have given special attention to the treatment of this disease for several years and in most cases we can **guarantee a cure.**

CURE OF VERY BAD CATARRH.

I had been a great sufferer for about seven years with catarrh in my head. I experienced great pain at times, and was troubled all the time with a discharge which inflamed my eyes, and gave me a sore throat; this discharge was so offensive that persons avoided my society, which was a source of great discomfort to me. Wishing to get well, I tried a great many remedies, but they failed to do me much, if any good. I was suffering terribly, when a friend advised me to go to Dr. GALLOWAY, 1230 Walnut Street, as he knew he could cure me. I put myself willingly under the Doctor's care, and in about three weeks DR. GALLOWAY cured me entirely by his Electrical treatment. It is now four months since I was cured, and I remain well; my head is clear, my hearing is good, I have no pain, and that dreadful discharge is stopped. I feel better than ever before, and I would advise all so afflicted to put themselves without delay under the treatment of Dr. GALLOWAY.

LIZZIE LERMAN,

June, 1874.

615 North Thirty-Fourth Street, Phila.

CANCERS, TUMORS, SWELLINGS, &c.

These morbid growths generally yield to electricity.

CURE OF LARGE TUMOR.

Philadelphia, Feb. 5, 1867.

DE. M. J. GALLOWAY.

I herewith give my testimony of the important cure your treatment has made in my case. About three years ago, I received an injury which resulted in a swelling, gradually producing a large tumor. I tried all the known remedies, but they failed, and I was told by my physician that I could never be cured, except by a surgical operation. I afterwards applied to you, having no faith whatever in a cure, but, strange to say, in three weeks' treatment my tumor is gone. I will always speak in the highest terms of your new treatment. While under your treatment at 1230 Walnut Street, I have seen others cured of diseases that had baffled all other medical skill. Yours, truly,

CHAS. BRADLEY,

1239 South Fifth Street.

CONSUMPTION.

Consumption, that insidious enemy of the human race, carries off its tens of thousands every year. *Catarrh* in the head, for which affection our treatment is a sure cure, is one of the chief causes of bronchial and lung diseases. The inflammation spreading to the throat, producing Bronchitis, which, if not arrested, speedily communicates its baneful influence to the lungs, then follows softening and suppuration, and discharge of tubercles or small tumors. Many cases of Consumption arise from Dyspepsia and Liver Complaints, the nutrition and secretions of the system being so much impaired that the respiratory organs become diseased in consequence. Electricity, applied according to our method, purifies the blood, quickens the circulation, decomposes and throws off tuberculous deposits, and stimulates the nutritive functions to build up that part of the system which has undergone decay.

BAD CASE OF HEMORRHAGE OF THE LUNGS CURED.

DR. GALLOWAY.

Philadelphia, August 30, 1870.

It affords me much pleasure to give my testimony in favor of your wonderful treatment. I had suffered for a long time with frequent attacks of hemorrhage, and was reduced to a mere skeleton. I had taken medicine from several physicians of this city, but still I could not get rid of these severe attacks. My friends all thought that I was in the last stage of consumption. In this condition I put myself under your care, and after a few visits I felt entirely changed. In three weeks your skillful treatment cured me perfectly, and I have spit no blood since I first consulted you. It is now over two years, and during the whole time my health has been good and I have gained in flesh.

M. A. DONAGHUE,
330 Union Street,

BRONCHIAL CONSUMPTION CURED.

Brownsville, October 3, 1873.

DR. GALLOWAY—1230 Walnut Street, Philadelphia.

It is now five years since you cured me of Bronchial Consumption, which threatened my life. I have been a better man since than I was for several years before, and I am sure that it was your treatment that cured me.

C. D. MATTHEWS, MERCHANT,
Brownsville, Fayette Co., Tenn.

CURE OF GENERAL DEBILITY.

This certifies that DR. GALLOWAY has cured me of a prostration that was general, all over me. My appetite was poor, digestion very weak, and my sleep was much disturbed, and did not refresh me. Hearing of his great success as an Electrician, I put myself under his treatment, and after a few applications I was completely cured, and now feel perfectly well.

JOHN BOWERS,
615 North Thirty-Fourth Street, W. Phila.

COMPLETE PARALYSIS CURED.

Philadelphia, March 24, 1873.

DR. M. J. GALLOWAY.

Dear Sir: When I applied to you last October, I was suffering with Complete Paralysis of my arm. I had no power to move it, nor was there a particle of feeling in it; to all appearance it was perfectly dead. I had hopes in only one thing, and that was Electricity when applied by you, for I know of many persons you had cured who had been considered hopeless, and I thought there was a chance for me. After examining me, you pronounced me paralysed. You gave me six applications, which brought life to the dead limb, and restored it entirely.

J. E. WELLS,

Mansion House, Ridge Avenue and Wissahickon.

CONSTIPATION,

which has been called the father of diseases, will in almost every case succumb to the healthful and alterative power of our treatment.

CONSTIPATION AND LIVER COMPLAINT CURED.

Philadelphia, July 9, 1874.

To DR. GALLOWAY, 1230 Walnut Street:

Dear Sir: For several years I have suffered a great deal from a morbid, irritable state of my bowels, caused, as my physician oftentimes told me, by liver complaint. I have swallowed medicines almost daily for over two years, but with little or no benefit. I consulted you a little over a month ago, and a few of your electrical treatments perfectly cured me. My health has been better since than for years before. Gratefully yours,

GEORGE GOETZ,
729 Parrish Street.

THE CURES ARE PERMANENT.

Padnor, Delaware Co., April 17, 1878.

DR. M. J. GALLOWAY:—Ten years ago you cured me of a bad costive habit. In fact it seemed that my bowels were partially dead, so that I was obliged to take medicine every day. I have never taken a dose of medicine since you cured me, that is in ten years, and all the time have enjoyed first-rate health, which shows that your cures are lasting and permanent.

WILLIAM McELROY.

EPILEPSY CURED.

Barnsboro, New Jersey, April 12, 1877.

DR. GALLOWAY, 1230 Walnut Street, Philadelphia:

Dear Sir: I had suffered for a long time with that distressing disease Epilepsy, and had tried so much that I thought I could never be cured. The fits would come on me suddenly and without warning, so that I was in continual fear. My health was being broken down by them, and my memory was in a shocking state. This was my condition when I called on you, and it was only as a last resort, for I had tried everything else. After an examination, you told me you could cure me, and I at once commenced your treatment. Wonderful as it will always appear to me, I never had a fit after the first treatment. It is now a year since I was last treated by you, and my health remains excellent.

Truly yours,

CHARLES BOWERS.

KIDNEY DISEASES.

In diseases of the Genito-Urinary tract, producing weakness of the organs, extreme general nervousness, milky urine, pain in the back, frequent urinating, diabetes, etc., our treatment usually in a remarkably short time restores the patient to health. In this class of diseases we have had a very large practice for years as it is a *specialty* with us, and in such cases we make cures that are truly wonderful.

INFLAMMATION OF KIDNEYS AND SLEEPLESSNESS.

M. J. GALLOWAY, M. D.:

Philadelphia, December 4, 1873

Dear Sir: I most cheerfully give you the following statement for publication, hoping that some afflicted persons will be benefited by it. This certifies that I have suffered with chronic Inflammation of the Kidneys for eight years, and during that time I spent about two thousand dollars in trying to get cured. I have been to nine doctors, besides I have taken a great deal of patent medicines, and they all failed to cure me. When I applied to you I was so bad that I could not turn in bed without great pain and difficulty, and I was troubled with sleeplessness. I could neither walk nor ride any distance with pleasure. After you gave me eight treatments I found I was a well man, and that you had done for me what all the other doctors and medicines had failed to do, that was to give me comfort and health. I now sleep well, and can get out of bed as well as I ever could. I can be on my feet all day, and my business is now a pleasure to me instead of a thing to be dreaded, as it was when I went under your treatment. Any suffering from this complaint call on me.

JAMES MATLEY,

209 Race Street.

For all diseases of the lungs, throat, and chest, electricity stands unrivalled. For catarrh in the head our treatment is a specific.

CATARRH WITH OTHER COMPLAINTS.

Philadelphia, February 5, 1875.

This certifies that DR. GALLOWAY, of the Electropathic Institution, has entirely cured me of bad catarrh in the head, from which I had suffered for more than two years. It was extremely troublesome and unpleasant, and all the remedies I tried had no good effect on it. The Allopathic and Homeopathic treatment were both resorted to by me, but I kept getting worse. In fact, I was beginning to feel despondent, thinking I would never get cured. My general health was also giving way, and I had a severe hemorrhage from the lungs. I was much debilitated, and had felt very badly for a long time, especially in the mornings. In this condition I consulted Dr. GALLOWAY, who examined me, and then assured me he could cure me perfectly. I immediately went under his treatment, and in a few days felt much better. I kept growing better, until now, at the end of a month, I am completely cured. My head is without pain, clear and bright, and the copious secretion that was so annoying has ceased. My lungs are now strong and healthy, and my former energy has come back to me. It will afford me pleasure to advise the suffering to go under DR. GALLOWAY's treatment, as I am certain he can cure when others fail.

GEORGE K. WHITE,

With Hood, BONBRIGHT & Co., 811 Market Street.

DYSPEPSIA.

We have treated more cases of this distressing disease than any other, and we rarely meet with a case, however bad, that we do not cure.

ASTONISHING CURE OF DYSPEPSIA.

Radnor, Delaware Co., Pa., January 21, 1878.

To the afflicted:—I had been sick fully two years, and was running down all the time. I was taken with dreadful pains in my side and stomach, and would throw up everything I would eat. I had five doctors, the best in the country, and all of them gave me up and said I would die, as there was nothing could cure me; I lost fully ninety pounds, and my stomach got so that when I sent for DR. GALLOWAY I could eat nothing and was wasted to a skeleton. Had a change not been made I could not have lived many days. I suffered a great deal with cold feet and hands, and was restless and could not sleep. I had no faith that anything would do me good, as I felt that the life was nearly gone out of me. DR. GALLOWAY, after examining me, assured me that he could cure me, and truly wonderful to myself and family, I felt much better after the first electric treatment he gave me, and kept gaining after every one until in a short time my appetite returned and my strength with it, so that my cure was an established fact. I shall always feel thankful to DR. GALLOWAY, and believe that he saved my life. There never was a much worse case than I was, and I feel that I am now a new man. The money that I spent in drugs was thrown away, but the money paid to DR. GALLOWAY was the best invested money I ever spent in my life. I now sleep well and am rapidly gaining my lost flesh. I will do my best to open the eyes of people, and send the sick and suffering, from whatever cause, to DR. GALLOWAY, for I know he can cure them. My friends who knew my condition wonder how it was possible I could be cured.

My nephew, John Campbell, with Young, Smyth, Field & Co., 429 Market Street, who knows all about the case, will, as well as myself, be pleased to be called on in reference to my remarkable cure.

CAMPBELL McPHERSON, RADNOR.

SEVERE DYSPEPSIA CURED.

DR. GALLOWAY:

Philadelphia, May 30, 1866.

Dear Sir: I have been afflicted with Dyspepsia and Liver Complaint for a long time, and in trying to get cured I had exhausted all the remedies of five physicians, but only continued to grow worse. Hearing of your success, I called on you, and after six application I am now a well man.

In attempting a definition of my disease, I can only give some of the many symptoms which, taken altogether, were the most horrid. I had dyspepsia, bad marasmus, or wasting of the tissues of the whole body; at times a difficulty of breathing, some palpitation of the heart, trembling of the limbs after exercise, aversion to business or company; at times gloomy, inability to collect my thoughts vigorously on any subject, a loss of memory, pain in various parts of the body; suffered much from lumbago, constant dragging pains in the lumbar region, and severe nervous dizziness.

I say to dyspeptics everywhere, call on you at the Philadelphia Electropathic Institution, 1230 Walnut Street, and be cured.

WILLIAM FRITZ,
Twelfth Street and Montgomery Avenue.

ROARING IN THE HEAD AND DEAFNESS.

Philadelphia, April 15, 1872.

To DR. M. J. GALLOWAY: The remarkable cure which I have derived from your treatment compels me to thus acknowledge the great obligations I am under to you for giving me good hearing and a clear head. When I applied to you I was entirely deaf in my right ear, with constant ringing and roaring in the head. I tried different remedies, but got no relief, all about me was noise and ringing. About this time one of your pamphlets providentially came into my hands. I read it with much interest, and was induced to call on you. After an examination, you guaranteed my cure at a very reasonable charge, and I am happy to say that in ten applications I was entirely cured, and have not been troubled since. I cheerfully recommend all similarly afflicted to apply to you.

JOHN KERSHAW,

1840 Market Street

PELVIC COMPLAINTS.

In our experience we find that no organs of the body are more liable to derangement than those situated in the pelvic basin.

Males and females are equally liable to diseases or weakness of those organs. Our Electrical Treatment is especially adapted to the cure of such complaints, reaching (as no other remedy can) by direct polarization the diseased part, whether it be in the glands, vessels, nerves, muscles, or other tissue—it carries with it strength and tone, stops debilitating and abnormal secretions and discharges, by reducing inflammatory action and imparting vigor and contractility to the fine muscular and nervous texture, electrifies and enriches the blood, and in a short time gives a healthy tone to the relaxed organism.

KIDNEY COMPLAINT AND DEBILITY CURED.

Philadelphia, May 24, 1877.

This certifies that DR. M. J. GALLOWAY, of 1230 Walnut Street, has cured me by the Electrical Treatment of Kidney Complaint, and a general run down condition of my system. I was suffering much pain in body, and great depression of spirits, when I commenced his treatment, but after a few visits my pains left me, and I felt bright and happy. I was also greatly troubled with Lumbago, and a dragging feeling through the small of my back. In fact, I thought it was doubtful if anything would do me good. After four weeks of DR. GALLOWAY's treatment, I felt rid of all my sufferings; and as several weeks have since elapsed, I know it is permanent, for I feel better every day. Of course I have now great faith in DR. GALLOWAY, and advise the afflicted from any cause to try him. I shall take great pleasure in being referred to.

J. C. KING,

213 Pine Street.

FEMALE COMPLAINT CURED.

Philadelphia, October 9th, 1877.

I gladly give my testimony to the astonishing cures performed at the Philadelphia Electropathic Institution.

This certifies that MRS. DR. GALLOWAY cured me more than a year ago of a complication of diseases peculiar to my sex, and I have enjoyed excellent health ever since. I had been a great sufferer for about six years, with internal diseases, causing dragging pains and weakness in my back, which made me miserable. I would tire out on the least exertion, and was forced to lie down the most of my time. In fact, I felt so bad, that I was afraid my mind would give way. I tried the different treatments, but nothing did me any permanent good until I took the Electrical Treatment from Mrs. Dr. Gallo-way. In ten visits she cured me perfectly. I would advise all suffering as I was, to go to 1230 Walnut Street, for I know they will be cured also.

MRS. LOUISA F. DRAKE,

2227 Franklin Street.

PARALYSIS.

Palsy, Hemiplegia, Paraplegia and all diseases affecting the motion and sensation are under the control of electricity. We have made many astonishing cures in such cases.

GENERAL PARALYSIS CURED.

DR. M. J. GALLOWAY, 1230 Walnut Street:

Dear Sir: To you I owe my health, and under a Divine Providence I believe my life. In the early part of the winter of 1865, I was attacked with Paralysis all over my body, rendering me helpless for several days; every hour was supposed to be my last. From this attack I partially recovered, so that, with the help of friends, I could move about my room. I continued in this condition for several weeks, and although I had good medical attendance I got no better, and my physicians told me that I was incurable. My only hope now turned upon electricity, and your skill in applying it. I was carried down to your office, and, after an electrical diagnosis, you promised to cure me. At first I could not believe it, but the trial convinced me of my error. After a few applications I dispensed with my crutches, my cane soon followed them, and I could feel a healthy action all over my body. The constant giddiness and pain in the head which had troubled me from the first left me; the paralyzed limbs regained their natural strength, and at the end of two months I could say with inexpressible joy that I was a well man. An interval of four years and a half has elapsed since my cure, and I have been able to attend to business every day during that time. With the hope that some sufferer may see this, I pen it, and with the greatest pleasure I commend to the afflicted the use of electricity in the hands of DR. GALLOWAY.

ISAAC REICHELDERFER,

1025 Nectarine Street, Philadelphia.

SCIATICA.

This disease is seated on the large nerve which commences at the lower part of the spine and runs the entire length of the lower limbs ending in the feet. The pain which is usually violent, extends down the thigh to the bend of the knee, then down to the ankle, heel and foot. Our electrical treatment only can be relied on in all cases, acute or chronic, it gives immediate relief, which is followed in a short time by a permanent cure.

SCIATICA IN ITS WORST FORM CURED.

Philadelphia, January 11th, 1876.

M. J. GALLOWAY, M. D.

Dear Doctor: About two months ago, I consulted you, as I was suffering from severe Sciatica. I was so bad that I could not attend to my business, and the pain was so severe that at times it was unbearable. I had suffered with it for sixteen months and had taken medicine from six or seven doctors, and was seven weeks in the Hospital trying to get cured; still I got no relief but felt much weaker from the medicines I took. After you examined me, you assured me that you could make a cure in my case. After the first electrical treatment you gave me, I walked down to Third Street without sitting down once, and I believe I could have walked all the way home. I felt that I was a new man. Every subsequent treatment improved me, so that in three weeks I was perfectly cured. My pains are all gone, and my old strength has returned to me, so that I now attend to my business as formerly.

Most truly yours,
DAVID McCOLLOM, No. 726 N. Front St.

SCIATIC RHEUMATISM CURED.

Philadelphia, April 24, 1878.

DR. M. J. GALLOWAY.

Dear Sir: I cheerfully make the following statement of my cure, and wish it to go forth to the public, that other afflicted ones may see it and go to you and be cured. I had suffered dreadful pain from Sciatica since last December, and had tried three different doctors, and taken a great deal of medicine, but they all failed to do me any good. My pain was better imagined than described. I was nearly discouraged and despaired of ever getting well, when a friend that you had cured of a horrid case of Dyspepsia, advised me to go to you for treatment, saying that he was positive you could cure me. I took his advice and put myself under your treatment, which is pleasant and agreeable, and what astonished me, I felt better after your first treatment. The agony that I suffered both day and night soon left me, and every treatment acted just as well as the first, so that I am now entirely cured—thanks to you and your Electricity. The disease had wasted my leg to half of its natural size, but now it is nearly as large as the other, and I can walk as well as ever. I was also suffering with Kidney Disease which soon yielded to your treatment. I shall take pleasure in being referred to. Most truly yours,

D. A. MERRICK,
Sup't Freight Depot, P. R. R., Walnut St. Wharf, or 438 S. 3d St., Camden.

EPILEPSY AND ST. VITUS' DANCE.

These and other kindred nervous diseases are caused by an unbalanced state of the electrical polarities of the nervous system. Electricity when scientifically applied cures these cases by removing any irritation that may exist, and restoring the lost balance.

ASTONISHING CURE OF EPILEPTIC FITS.

Kellyville, Delaware County, Pa., Dec. 3, 1871.

I cheerfully make the following statement of facts concerning my daughter's wonderful cure: In last March my daughter Lizzie was attacked with Epilepsy, produced as we supposed, from being struck on the head. The fits would come on regularly every nine days. We tried all the remedies that we heard of, as well as the best of medical advice, but they all failed to do any good; on the contrary, her fits grew more severe, so that the attacks would hold her insensible for four hours at a time. The suffering she passed through during the spells cannot be told. About the middle of last August, I was advised to take her to DR. GALLOWAY, 1230 Walnut Street, Philadelphia. I went there with little hopes of her ever being cured, as I had lost faith in all remedies. As soon as this gentleman examined her, he assured me that he could cure her perfectly in a short time, and, strange as it may appear, his predictions are verified, and she is now as well as ever. She has had no fit, not even a symptom, since I first took her there; her general health, and her memory, which were both impaired, are entirely restored. I will always feel grateful for the great good this gentleman has done my daughter, and hope that others afflicted may see this and go there and be cured also.

JAMES OUSEY, Kellyville.

We are daily curing persons suffering from too much brain work.

UTTER PROSTRATION OF THE SYSTEM.

DR. M. J. GALLOWAY.

Dear Sir: With the hope that others so afflicted may see this, I make the following statement of facts: I had suffered with female weakness for about two years, and was utterly prostrated, so much that life was a misery to me. I had been under the care of five doctors, but they failed to cure me. I was advised by a friend to go under the treatment of DR. GALLOWAY, 1230 Walnut Street, Phila. I did so at my earliest convenience, and in a few weeks he cured me perfectly of my weakness and distress. I would advise the afflicted to consult him, as he can tell them whether or not they can be cured. I will always feel grateful to him for my cure. Electricity in the hands of Dr. Galloway is far ahead of medicines in the cure of diseases, especially those of long standing.

ANNA LAMB,

February 18, 1875.

Cecil County, Maryland.

THE PHILADELPHIA ELECTROPATHIC INSTITUTION.

The subtle power of electricity is now recognized as pervading all nature. Our most thorough scientists are agreed that we are only on the threshold of investigation concerning its nature, functions and utility. It is, however, conceded that its use as a messenger in transmitting messages is one of the least of its applications. Its application to the cure of diseases has been brought to the dignity of a science, and given rise to a new school of medicine known as Electropathy.

Ever since the first discovery of electricity, or galvanism, it has been applied occasionally to the curing of diseases with very startling results, considering the imperfect knowledge and crude appliances brought into requisition; but within the last fifteen years, Dr. M. J. Galloway, the well-known medical electrician, of this city, has organized a system of treatment for all classes of diseases to which the human frame is liable, and with such successful results that there is no longer any doubt among any school of medicine of the efficacy of electricity when intelligently and scientifically applied by an educated physician. Dr. Galloway has had such success and such extensive patronage from our best class of citizens, that he has for years maintained a large Electropathic Institution, for the practice and the teaching of the system, at No. 1230 Walnut Street, two doors east of 13th Street.—*Phila. Commercial.*

LECTURES.

THIS being the first and only institution Chartered to teach this new system of practice, since its incorporation a large number of students, comprising both sexes, have attended lectures and practical instruction, and are now in successful practice in different parts of the country. The mysterious currents of electricity are being adapted to many wonderful uses, but the grandest of all is to cure humanity of the thousand and one ills to which flesh is heir.

Electropathy is a science founded on incontrovertible facts, and is the product of large experience. It is all that the most enthusiastic claim for it, and rapidly makes converts wherever introduced. Fine opportunities are offered to those who study this system, as owing to the popularity of this practice, there is great and increasing demand for our graduates.

Students can enter at any time and when qualified will receive Diplomas.

The course of instruction is given by competent professors, one of whom is the well-known discoverer in Electropathy.

EXPRESSION FROM THE GREAT PHRENOLOGIST.

Continental Hotel, Philadelphia, Feb. 10, 1868.

To DR. M. J. GALLOWAY, 1230 Walnut Street.

It affords me much pleasure to recommend you as a physician, both in my public lectures and private examinations. Your treatment is the most rational, and in fact the only system of medical practice that has philosophy to commend it. A large portion of humanity are ekeing out a miserable existence, sickly, scrawny, dyspeptic and nervous, who, by a few visits to your institution, would become balanced, healthy and happy. Every organ and function of the body, every faculty of the mind, can be regulated by electricity according to your system, so that man's life will be a period of enjoyment instead of pain and suffering, as we too often find it. From a careful investigation of your treatment, I confidently believe that, in the march of progress, the day is not far distant when drugging will be abandoned, and your scientific and health-giving system of practice will be universally adopted. God hasten the time.

Yours truly,

Professor O. S. FOWLER, Phrenologist.

FROM THE HON. E. JOY MORRIS,

LATE MINISTER TO TURKEY.

I have received so much benefit from the Electrical treatment of DR. GALLOWAY, that I take great pleasure in recommending his system.

E. JOY MORRIS,

Phila., March 18, 1872.

837 N. Broad Street.

FROM THE HON. A. K. DUNKEL,

SENATOR FROM THE SIXTH DISTRICT, PENNSYLVANIA.

DR. M. J. GALLOWAY:

Dear Sir: Having been afflicted with Nervous Prostration and Liver Complaint for a number of years, and having received relief from your Electrical treatment, it gives me great pleasure to add my testimony as to your skill, and recommend others so afflicted to apply to you at once, as I am only too sorry that I did not avail myself of your scientific treatment sooner.

A. K. DUNKEL,

March 20, 1875. 27 Sth. Nineteenth Street, or 328 Chestnut Street, Phila.

**FROM THE PRESIDENT OF THE EXCHANGE BANK,
ATCHISON, KANSAS.**

DR. M. J. GALLOWAY—Dear Sir: Electricity in your hands is the great curative agent of the present day. I had exhausted the remedies of a dozen or more physicians, and had even taken Electrical Treatment before hearing of you, but they all failed to reach my complaint. Six weeks of your treatment has entirely cured me of a complication of diseases that unfitted me for business, and made life a burden. I cannot speak in too high terms of your treatment.

WM. HETHERINGTON, Atchison, Kansas.

June 27, 1877.

GLENMARY ELECTROPATHIC CURE,

OWEGO, N. Y.

Branch of the Philadelphia Institution.

We have purchased the estate of Glenmary, formerly the residence of N. P. WILLIS, the poet, and have established there an Electro-pathic Cure or Home. This supplies a want that has been long felt in the practice, prominently so in the case of such patients as needed quiet surroundings, instead of the noise and bustle of the city. It is a branch of the Philadelphia Institution—a country place of surpassing beauty—where those out of health, leaving the depressing influences of city life, can avail themselves of this truly scientific treatment, with rest and proper diet. Nature and art have both contributed largely, almost lavishly, to make it a delightful spot, and it has been selected, after considerable looking about, as the place best suited for the above purpose. Among the many attractions presented is an iron spring of great value.

OWEGO is the county seat of Tioga County, N. Y., and is about 1000 feet above ocean level. It is on the line of the New York and Erie Railroad, also on the Southern Central Railroad, which connects with the Lehigh Valley Railroad at Sayre, and is reached directly by these roads from Philadelphia or New York in a few hours.

The extreme healthfulness of the climate, the mountain air being highly charged with ozone, the purity of the spring water that supplies the house and grounds, and the picturesque and varied scenery of the surrounding country, combine to give the most brilliant and satisfactory results in Electro-therapeutics.

For further information, concerning board, treatment, etc., at the country institution, call on or address

DR. M. J. GALLOWAY,

1230 Walnut Street, Philadelphia.

REFERENCES.

We refer to the following well-known persons who have been successfully treated by us, and wish the suffering to know it:
